EXAMINER'S COMMENTS

In the amendment dated 12/15/05, Applicant amends claims 1, 13, and 17 to distinguish the instant invention over prior art. Each of the claims now recites the limitations of a fan comprising a motor and a fan blade operatively connected to the motor. Individually, claim 1 recites the limitations of a transverse through-hole constructed through an interior of each of the slats across the width thereof such that the transverse through-holes are colinear when the slats are positioned side-by-side. Claim 13 recites the limitations of a series of thin longitudinal slats positioned edge-wise parallel to each other in the same plane, and a hole running approximately perpendicular to the series of thin longitudinal slats through an interior portion of the slat from one edge to another. Finally, claim 17 recites the limitations of a hole constructed width-wise through the longitudinal wooden slats, and a dowel is received in the holes such that at least two longitudinal slats are firmly held together width-wise in the same plane. These limitations are deemed improvements over the prior art cited in previous Office Actions. Therefore, claims 1-20 are allowable.
